

Instructions to run TorchOpenFace

- Enter build directory of OpenFace

```
cd /data/scanavan/saandeep/OpenFace2.0/TorchOpenFace
```

- Set CUDA environment variables

```
sh set_vars.sh
```

- Run sample code. This should take about 30 seconds to run.

```
sbatch t_run.sh
```

- Check the `slurm-<job-id>.slurm` file to see if there are any error.
- If no errors, Output should be saved in `./data/processed` directory after some time.
